

| CODIGO         | Análisis metales |               |
|----------------|------------------|---------------|
| Plata (Ag)     | ppm              | 0.1 - 100     |
| Aluminio (Al)  | %                | 0.01 - 5      |
| Arsénico (As)  | ppm              | 5 - 5000      |
| Bario (Ba)     | ppm              | 0.5 - 5000    |
| Berilo (Be)    | ppm              | 0.5 - 5000    |
| Bismuto (Bi)   | ppm              | 5 - 500       |
| Calcio (Ca)    | %                | 0.01 - 15     |
| Cadmio (Cd)    | ppm              | 0.25 - 5000   |
| Cobalto (Co)   | ppm              | 0.25 - 5000   |
| Cromo (Cr)     | ppm              | 0.5 - 10000   |
| Cobre (Cu)     | ppm              | 0.5 - 10000   |
| Hierro (Fe)    | %                | 0.01 - 15     |
| Galio (Ga)     | ppm              | 0.5 - 5000    |
| Mercurio (Hg)  | ppm              | 5 - 5000      |
| Potasio (K)    | %                | 0.010 - 15    |
| Litio (Li)     | ppm              | 1 - 5000      |
| Magnesio (Mg)  | %                | 0.010 - 15    |
| Manganeso (Mn) | ppm              | 0.500 - 10000 |
| Molibdeno (Mo) | ppm              | 0.050 - 10000 |
| Sodio (Na)     | %                | 0.010 - 15    |
| Níquel (Ni)    | ppm              | 0.25 - 5000   |
| Fosforo (P)    | ppm              | 25 - 10000    |
| Plomo (Pb)     | ppm              | 2 - 10000     |
| Azufre (S)     | %                | 0.01 - 15     |
| Antimonio (Sb) | ppm              | 0.25 - 2500   |
| Escandio (Sc)  | ppm              | 0.050 - 2500  |
| Selenio (Se)   | ppm              | 10 - 2500     |
| Estaño (Sn)    | ppm              | 5 - 2500      |
| Estroncio (Sr) | ppm              | .1 10000      |
| Teluro (Te)    | ppm              | 5 - 2500      |
| Titanio (Ti)   | ppm              | 10 - 10000    |
| Talio (Tl)     | ppm              | 5 - 2500      |
| Vanadio (V)    | ppm              | 1 - 10000     |
| Zinc (Zn)      | ppm              | 1 - 10000     |
